

# Tracking Management Tools

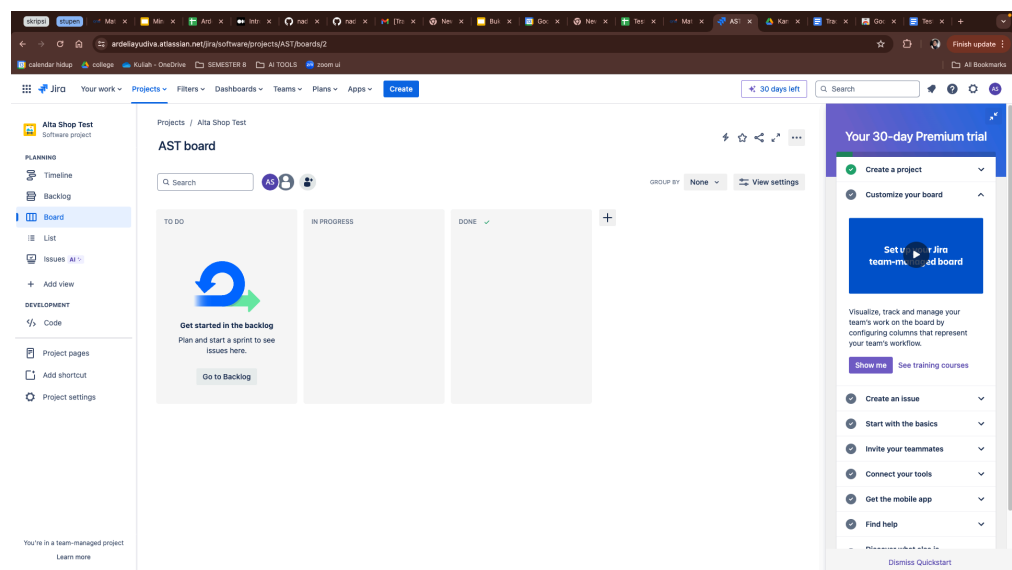

## Objective

Mengimplementasikan penggunaan tracking tool yaitu Jira.

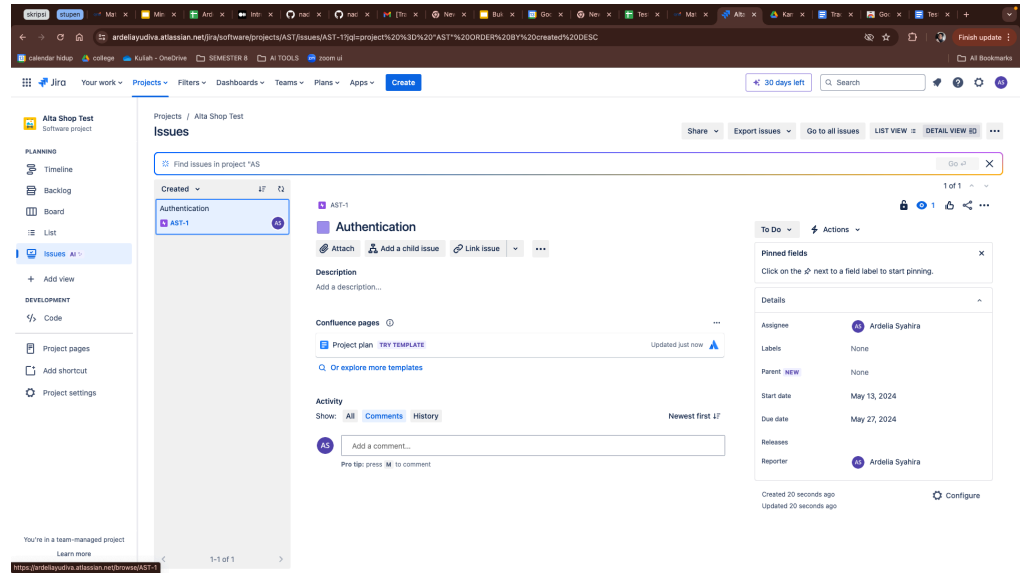

## Task

Buatlah simulasi terjadinya bugs pada suatu feature (Story, Task, Subtask). Deskripsikan Feature dan Bugs (minimal 2 untuk bugs) dari simulasi yang dibuat pada Jira. Lampirkan screenshot step-step pekerjaan berupa docs atau pdf.

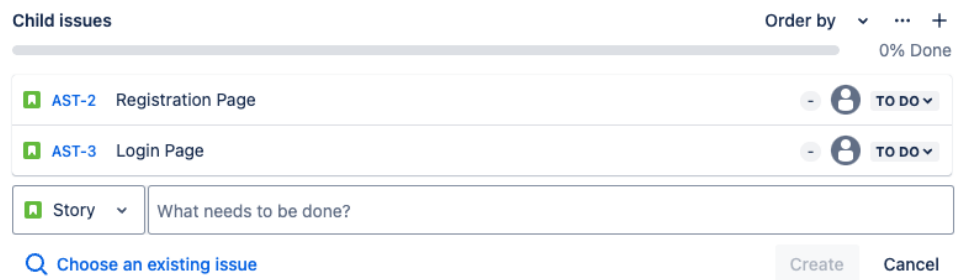

### 1. CREATE a Project

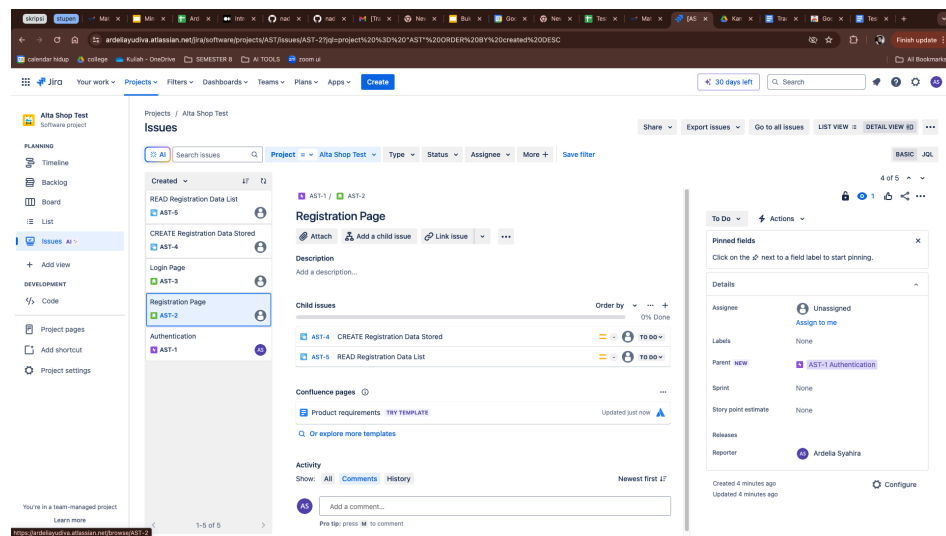

### 2. CREATE Epic Authentication

### 3. CREATE Story of Authentication (Register and Login)

### 4. CREATE Task for Registration Page

## 5. CREATE Task for Login Page

AST-1 / AST-3

### Login Page

Attach Add a child issue Link issue ...

**Description**  
Add a description...

**Child issues** Order by ... + 0% Done

AST-6	User Logged In Data Stored	-	TO DO
AST-7	System READ the login status of the user	-	TO DO
AST-8	User UPDATE an email or password	-	TO DO
AST-9	Admin DELETE an account from Account List	-	TO DO
AST-10	User can't access after admin deleted the account	-	TO DO

Subtask What needs to be done?

Choose an existing issue Create Cancel

## 6. CREATE an Issue for READ Registration Data List

Atlassian Jira Software project

Project: AST-11

User registered | Tidak masuk ke database dan tidak mendapatkan endpoint dari Postman

Attach Add a child issue Link issue ...

**Description**  
Add a description...

**Linked issues**  
AST-5 READ Registration Data List TO DO

**Confluence pages**
